EDUCATION

University of Virginia — Charlottesville, VA
Bachelor of Arts and Sciences, Computer Science — *Expected Jun 2024*

- **Major GPA**: 3.79
- **Coursework**: Data Structures and Algorithms, Artificial Intelligence, Cybersecurity, Algorithmic Economics, Computer Architecture, Advanced Software Development

PROFESSIONAL EXPERIENCE

MirageMatch (YC W24) — Charlottesville, VA
Software Engineer — *Jan 2024 - Present*

Bank of New York Mellon — New York, NY
Software Engineer Intern — *Jun 2023 - Aug 2023*

- Developed a Microfrontend for the Wealth Desktop Platform using Angular, streamlining internal processes and improving application performance 60% by optimizing data access
- Assisted in the development of REST APIs with Spring Framework, integrating them with the frontend for seamless data transfer and optimized operations
- Designed and implemented error handling mechanisms for key applications, leading to a 70% reduction in pipelining errors and enhancing system reliability for 300+ users

Fermat Capital Management - Boutique Reinsurance Hedgefund — Westport, CT
Software Engineer Intern — *Jun 2022 - Aug 2022*

- Produced .NET Core app to automate Catastrophe (CAT) bond data filtration, reducing manual processing time by 5 hours per week, significantly enhancing workflow efficiency and productivity
- Built an ML model with a 92% accuracy rate and implemented a system to detect and report erroneous predictions
- Optimized string manipulation operations by leveraging LINQ and REGEX, resulting in enhanced data processing speeds and system responsiveness

Software Engineer Intern — *Jun 2021 - Aug 2021*

- Developed a Angular web app that has been used to visualize over 40,000 data points of insurance loss
- Enhanced data visualization by integrating the Google Maps API, facilitating clearer dataset comprehension and expediting decision-making processes
- Improved application performance and ensured seamless user experience by optimizing asynchronous call handling with Threading and Promises, leading to faster data retrieval and processing

TECHNICAL PROJECTS

Imperium | *Flutter, Dart, Firebase*

- Created full-stack workout tracking mobile application utilizing Flutter and Dart incorporating state management, successfully launched on the iOS App Store
- Integrated Firebase Firestore for easy scalability and real-time data handling, enabling users to persist and retrieve their workout data. Implemented Firebase Authentication to provide secure user access control

Vibify | *Next.js, Spotify API, NextAuth, Javascript*

- Developed a web application using Next.js, integrating with the Spotify API to enable user authentication
- Created an "Anytime Spotify Wrapped" functionality, allowing users to visualize and understand their listening habits by showcasing their most played music

LEADERSHIP EXPERIENCE

Alpha Kappa Psi Professional Business Fraternity — Charlottesville, VA
Member — *Sept. 2021 - Present*

- Organized and led a series of tech workshops aimed at educating students about current technologies and offering insights into the tech industry
- Contributed as a key facilitator in an 8-week intensive training program covering finance, venture capital, consulting, marketing, and networking, aimed at enhancing the professional skills of participants

TECHNICAL SKILLS

Languages: Java, Python, C++/C#, Dart, Typescript, JavaScript, HTML/CSS, x86
Technologies: React.js, Next.js, Node.js, Flask, Flutter, Angular, FastAPI, Firebase, Git, Linux, Unix
